AVEVA™ Operations Control

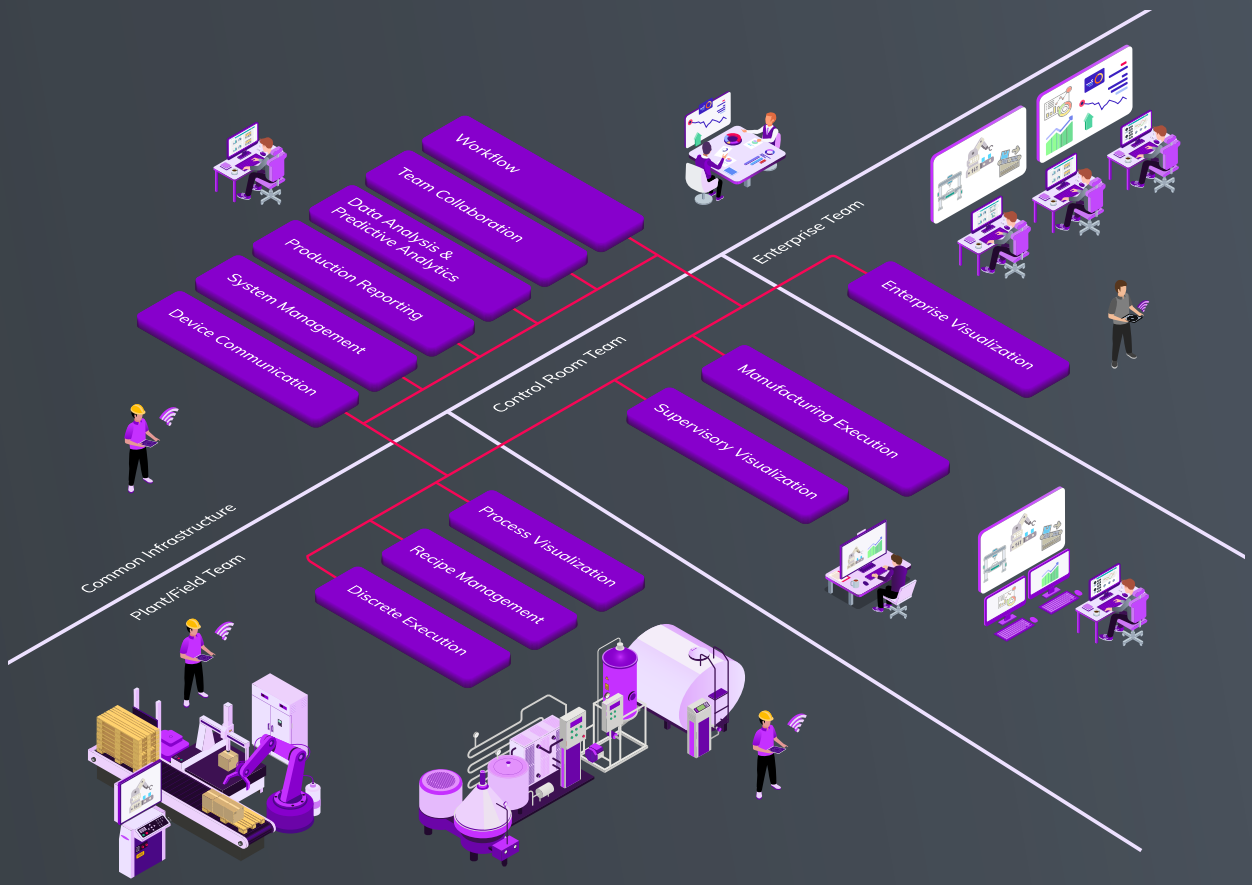
AVEVA's industrial software empowers organizations to engineer smarter and operate better. While perspectives at each level of operations may vary, AVEVA Operations Control offers a single source of truth and connects teams to actionable information at every level.

AVEVA Operations Control provides software for modern industrial operations and gives teams consistent methods of collaborating and operating from a cohesive and sustainable set of tools.

From real-time HMI/SCADA, collaboration, and reporting, to manufacturing execution and predictive analytics, AVEVA Operations Control combines edge computing, hybrid deployment, cloud analytics, mobile access, and AI into a comprehensive operations software package.

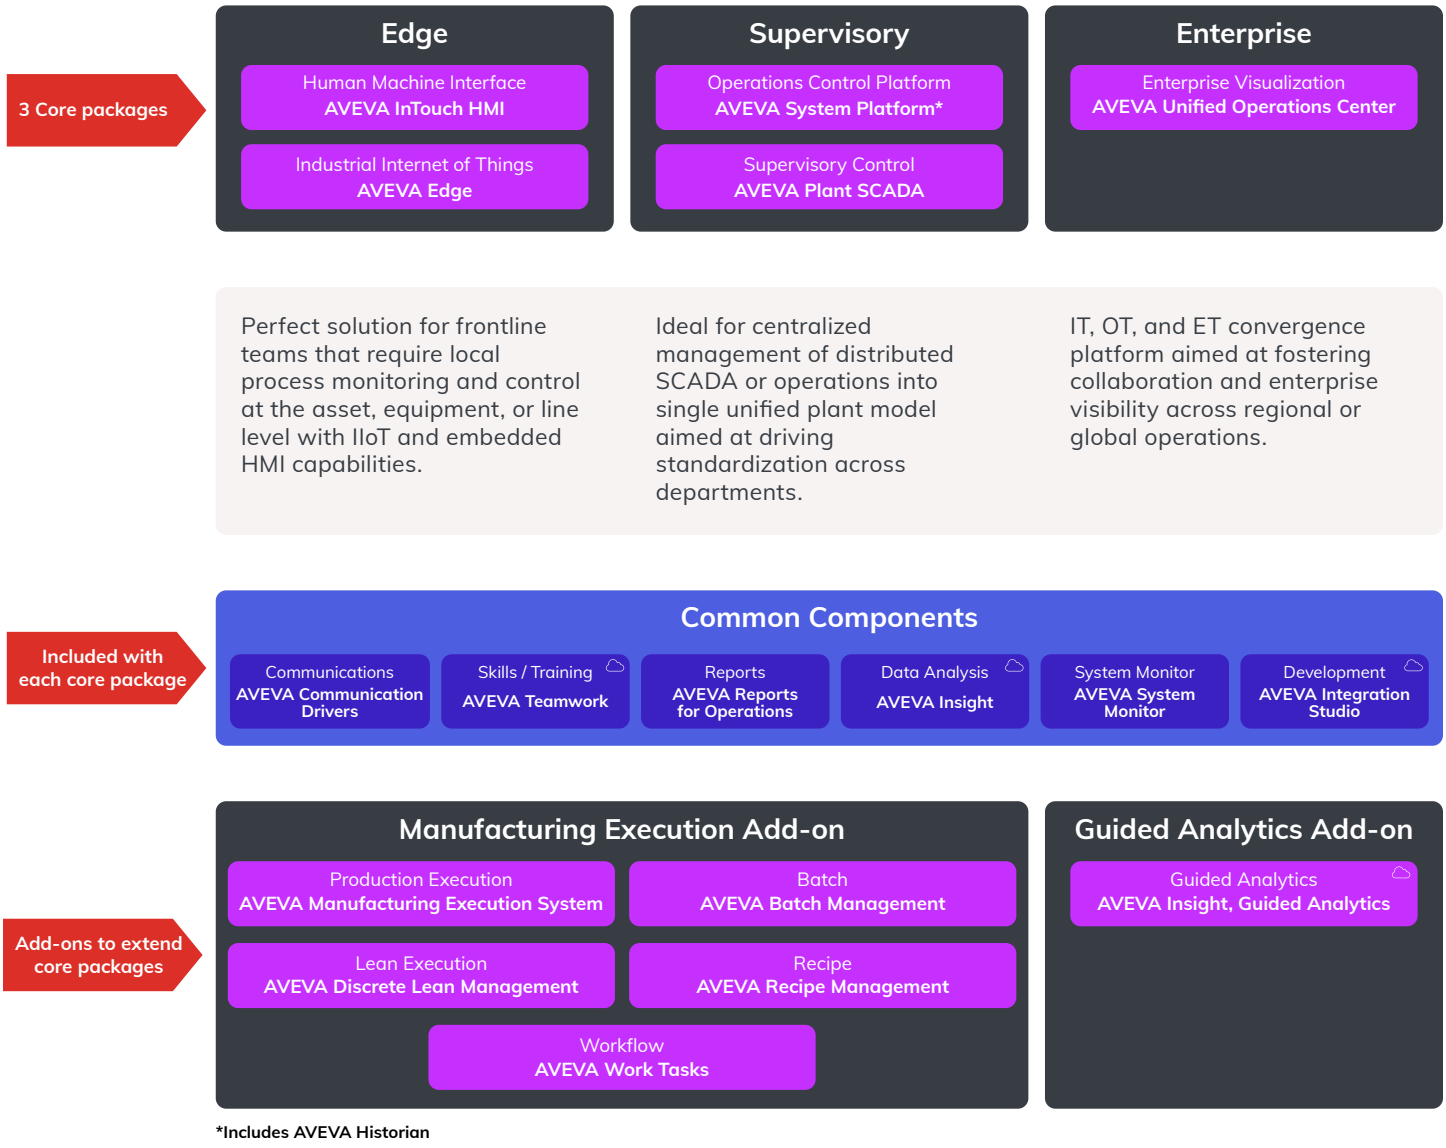
Key benefits

- **Digitize work processes and knowledge**
- **Transform operations with unparalleled insights**
- **Drive collaboration and confidence in systems & information**
- **Reduce waste & optimize production**
- **Improve operational awareness from edge to enterprise**
- **Accelerate better decision-making**
- **Benefit from hybrid cloud and IIoT architectures**
- **Align teams towards operational excellence**



Complete operations control in three packages

Three core packages provide all the tools necessary for plant/field, control room, and enterprise teams to garner actionable information, collaborate effectively, and accelerate operational excellence. Need more advanced functionality? Extend your core package with Manufacturing Execution or Guided Analytics add-ons.



*Includes AVEVA Historian

Achieve faster return-on-investment and remove traditional barriers to software adoption with a flexible subscription program called AVEVA Flex. Simply choose the AVEVA Operations Control package that suits your needs, and you're done!
